Features

✓ Visual indication of A and B detection zone

✓ Visual Display of reader transmission range

✓ Visual indication of reader transmission range

TVD4 | Detector Key Fob Tag

The TVD4 Tag is a normal TV4 tag modified to include a Red, Green, and Amber LED. When the TVD4 tag detects an interrogation field produced by the reader, the Red LED will illuminate for detection zone A and the Green LED will illuminate for detection zone B. When a tag is within range of the reader, the Amber LED will illuminate to indicate a tag is being read. Can be used as a diagnostic tool and in system optimisation.

Technical Specification

Specification	Details
Dimensions	56 x 43 x 12mm
Weight	32g
Temperature Range	-20°C to +60°C (-4°F to 140°F)
Housing	Polycarbonate
LEDs	Red - Detection zone A transmission field
	Green - Detection zone B transmission field
	Amber - Tag being read
